### ABSTRACT

Data from a national survey of colleges and universities with foreign language programs revealed an increase of 4.5% in total foreign language registrations between 1980 and 1983, the first general increase noted since 1968. Registrations increased by over 10% in Chinese, Italian, Japanese, and Russian. French, Spanish, German, and the aggregate of less commonly taught languages showed smaller gains. Arabic, Ancient Greek, Hebrew, Latin, and Portugese had enrollment decreases. Spanish continued to be the leading language in U.S. colleges and universities, accounting for 41% of the total. The report contains a main section and two appendices. The body of the report consists of an introduction, 6 summary tables, and 15 detailed tables all reporting the full survey of college and university enrollments. The detailed tables present data by state or region for the seven most commonly taught languages/ and for the other languages as a group; as well as detailed, comparative figures from 1968, 1970, 1974, 1977, and 1980 surveys. The appendices include an institutional directory of language enrollments and a copy of the enrollment survey questionnaire. (Author/MSE)

Survey of Foreign Language Course Registrations in U.S. Colleges and Universities Fall 1983

March 1985

Modern Language Association of America, 62 Fifth Avenue, New York, N. Y. 10011

U.S. Department) of Education, International Education Programs, Grant No. G008302217

This report is based on a questionnaire survey sent to the registrars of all two-year and four-year colleges and universities in the United States. Replies were received from 2,972 institutions, of which 2,371 reported registrations in one or more languages other than English.

The fall 1983 survey shows an increase of 4.5% in total foreign language registrations between 1980, the year of the last previous survey conducted by the MLA, and 1983. This is the first general increase noted since 1968. Registrations increased by more than 10% in Chinese, Italian, Japanese, and Russian. French, German, Spanish, and the aggregate of the so-called "other" or less commonly taught languages posted more modest gains. Arabic, Ancient Greek, Hebrew, Latin, and Portuguese lost ground. Spanish continued to be the leading language in U.S. colleges and universities, accounting for 41.0% of the total.

The report contains a main section and two appendices. The body of the report consists of an introduction, six summary tables, and fifteen detailed tables, all reporting the full survey of college and university enrollments. The detailed tables present data by state or by region for the seven most commonly taught languages and for the "other" languages as a block, as well as detailed comparative figures from surveys undertaken in 1968, 1970, 1974, 1977, and 1980.

The two appendices are an institutional directory of language enrollments and a copy of the enrollment survey instrument.

Appendix II. Report Form Used in the Fall 1983 Survey.

### FOREYORD

The present study of college language registrations is the fifteenth in a series that the Modern Language Association has conducted under contract with or grant from the United States Office or Department of Education. It is the seventh to present data for all foreign languages, both classical and modern, in colleges and universities in the United States. The main body of the report consists of a set of six summary tables (designated Asthrough F), a set of fifteen tables giving detailed breakdowns of the Fall 1983 data as well as trends going back to 1968, plus a computer-printed directory of the complete language registration data reported by the 2,371 responding institutions which reported enrollments in one or more languages other than English.

To facilitate the study of trends in foreign language registrations over the period between 1960 and 1983, registration data from surveys undertaken in 1960, 1968, 1970, 1972, 1974, 1977, 1980, and 1983 were incorporated into summary tables A, C, D, E, and F; and data from the 1968, 1970, 1974, 1977, 1980, and 1983 surveys are juxtaposed in several of the detailed tables (specifically, tables 4 through 10 and 13). In the latter set of tables, the year 1968 has been chosen as the base year for the calculation of comparative index figures for the individual languages and regions to show the trends over the past fifteen years. The survey of 1968 reflects the peak of total foreign language enrollments in higher education.

It should be borne in mind, in consulting the comparative figures, that they derive from different institutional bases in the different years, ranging from a base of 1,661 institutions in 1960 to 2,371 in 1983. In each year, however, the response rate achieved by the MLA survey has been above 95%, in the last four surveys above 99%.

Since 1968 the foreign language research staff has made use of the MLA's computer for recording, compiling, and sorting institutional registration figures for the less commonly taught languages, i.e., all languages other than French, German, Italian, Russian, Spanish, Latin, and Ancient Greek. Since 1974 an expanded computer capacity has enabled the staff to record the entire body of data for commonly and less commonly taught languages alike, a total of 9,264 separate records in 1983. The data can be sorted and printed either by state and institution or by language. The directory portion of the present report consists of the complete print-out by state and institution, separately for the four-year and two-year institutions.

The data for the present report were compiled and tabulated by research associate Lenora Champagne, under the supervision of Richard I. Brod, Director of Foreign Language Programs. Computer programs for the sorting and printing of the data were developed by MLA's Computer Operations Manager, Cuyler Bleecker.

The staff is grateful to the U.S. Department of Education for its continued research support. We also acknowledge here the excellent cooperation of the college registrars and department chairs who supplied the data upon which the report is based.

In August 1984 the foreign language research staff of the Modern Language Association completed work on its Fall 1983 Survey of Foreign Language Registrations in U.S. Institutions of Higher Education, the fifteenth in a series of surveys conducted since 1958 under contract with the U.S. Office of Education of its successor, the U.S. Department of Education. Data for the survey were obtained from a questionnaire sent to the registrars of the 2,702 two— and four—year institutions listed in the MLA's computerized files, plus 298 additional institutions—primarily seminaries—listed in the Education Directory, Colleges and Universities, published by the National Center for Education Statistics (NCES). Replies were received from all but 28 of the institutions canvased, giving the MLA a response rate of 99.1%. Among the respondents, 2,371, or 79.8%, reported registrations in one or more languages other than English.

The 1983 survey shows a total of 966,013 foreign language registrations—an increase of 4.5% since the last published report, for the fall term 1980. This is the first reported increase since 1968, the peak enrollment year. The 1970, 1972, 1974, 1977, and 1980 surveys showed declines of 1.4%, 9.2%, 6.2%, 1.4%, and 0.9%, respectively.

Whether the growth evident in 1983 will lead to a sustained upward trend cannot be determined. In any case, language enrollment trends are less encouraging when compared with the continuing growth of college enrollments in general. Table A compares total college enrollments (as reported by NCES) with the MLA's figures for modern foreign languages, giving a percentage ratio for each of the years in which the MLA conducted its survey.

Table B presents the results of the 1983 enrollment survey, with a break-down by language for the twelve most commonly taught languages, plus an aggregate figure for the other languages; separate tallies for two-year colleges and undergraduate and graduate registrations in four-year colleges and universities; comparative totals from the 1980 survey; and a figure indicating percentage change in the language totals between 1980 and 1983. As the table shows, the various languages reveal widely different trends. Decreases were recorded for ancient Greek, Latin, Hebrew, and Bortuguese; Arabic, German, and Spanish held steady; French and Italian showed moderate increases; and enrollments in Chinese, Japanese, and Russian increased dramatically. Italian is now firmly established in fourth place among the languages. Russian, which held fourth place until 1977, is now fifth on the list, followed by Latin. The biblical languages, ancient Greek and Hebrew, hold seventh and eighth places; Japanese is ninth and Chinese tenth; Portuguese and Arabic are in eleventh and twelfth places.

The six leading languages—Spanish, French, German, Italian, Russian, and Latin—accounted for 90.9% of the total registrations in foreign languages in the colleges and universities covered in the survey; the other six languages listed in Table 2 accounted for an additional 7.7%, and the remaining 1.4% were distributed among 117 additional languages, ancient and modern. Spanish, having displaced French from its leadership position in 1970, remains the most widely taught foreign language in U.S. colleges and universities, as it has been in sacondary schools for many years. Spanish now accounts for 45.3% of the total registrations in the five leading modern languages. In 1960, Spanish had only 30% of the total, and French had 38.4%. Table C, used on the registrations in the five leading modern languages, shows the percentage of the total in each language from 1960 to 1983. Table D depicts growth trends in ten less commonly taught languages over the same twenty-three-year period.

In 1960, 455 two-year colleges reported foreign language registrations; by 1972 the number had peaked at 899, and was down to 835 by 1974. Since then the number has risen and fallen slightly from survey to survey. Having increased steadily since 1972, total language enrollments in two-year colleges underwent a slight (0.8%) decline between 1977 and 1980. Between 1980 and 1983 they held steady. While enrollments in French and German rose during the three-year period, those in Spanish fell by 6.5%. Still, Spanish, with 89,316 enrollments, accounts for 54.3% of the two-year college total; French has 24.8%, German 10.4%, Italian, Japanese, and Chinese (in that order) together account for an additional 6.9% of the two-year college language enrollment total.

Reference to the category of "critical" or "strategic" languages were used by the MLA, the U.S. Office of Education, and other agencies during the early 1960s but were later replaced by the designation "less commonly taught" languages. The line between commonly and less commonly taught is arbitrary, but most MLA survey reports have drawn it below the seventh language on the list in descending order of reported registrations. The group of commonly taught languages includes the five "leading" modern foreign languages -- French, German, Italian, Russian, and Spanish--plus Latin and ancient Greek. The remaining 122 languages for which enrollments were reported in 1983 fall into various overlapping categories: "strategic," that is, languages widely spoken in politically sensitive areas of the world, for example, Arabic, Hindi, Indonesian; "ethnic," that is, languages spoken by populations of immigrants (or descendants of immigrants) residing in the United States, for example, Polish, Norwegian, Armenian; biblical languages, like Hebrew; ancient languages, such as Ugaritic, Old Church Slavonic, and Old Icelandic, studied through written texts, and primarily by graduate students and scholars; and languages of native American minorities, such as Hawaiian, Navajo, and Yupik. Several languages fall into more than one category, like Portuguese (strategic and ethnic) or Hebrew (ethnic and biblical). Although the MLA's survey questionnaires request registrars to supply registration figures for all'languages, ancient and modern, it is likely that some officials omit data for ancient languages because they assume from the MLA's name that ancient languages are not to be included, and others omit figures for native American languages because these are not, strictly speaking, foreign. Accordingly, the MLA cannot claim authoritative accuracy with respect to enrollments in these categories. Needless to say, there are other instances where information supplied by a registrar may be less than wholly reliable; when, for example, the registrar fails to recognize an unfamiliar foreign word as the name of a language or fails to distinguish between language courses and literature-in-translation courses. On the basis of long experience with the surveys, the MLA believes such errors are relatively rare and that inflated figures, if there are any, are probably balanced by "hidden" enrollments overlooked by responding registrars.

Taken together, the less commonly taught languages—that is, all languages other than the "top seven"—have experienced considerable growth in recent years. In 1968, total enrollment in these languages was 32,813; in 1970, 45,752; in 1972, 59,532; in 1974, 64,132; in 1977, 63,938; in 1980, 64,263; and in 1983, 68,866. While less commonly taught languages as a group have grown nearly 110% during this fifteen—year period, certain languages have more than doubled their registrations, most notably Arabic, Chinese, and Japanese. Enrollments in Hebrew more than doubled between 1968 and 1974, but they have receded since then to a level that represents 79% growth above the 1968 figure. Enrollments in Swahili more than tripled between 1968 and 1977, but they have now fallen to a level below that of 1968. Similarly, Yiddish enrollments grew more than tenfold between 1968 and 1977; between 1980 and 1983, enrollments were halved.

#### NOTE

The reader should not conclude that a significant number of colleges do not offer languages. The survey was not limited to comprehensive colleges and universities; it included a large number of seminaries and business, technical, and specialized institutions.
